Rejlers signs long-term contract with Fingrid

Fingrid chooses Rejlers as an energy measurement and quality information supplier of Finnish nationwide high-voltage grid. The value of the agreement is 1.4 million euros.

Daily over 3.5 million measurement values of the nationwide high-voltage grid are collected and transmitted by the service. Fingrid's possibilities to analyze delivery reliability and interferences improves by Rejlers' skills and well developed solutions for data collection and quality insurance.

The agreement covers years 2014 – 2018, including option for additional two years.

Fingrid is the enterprise which takes care of the functioning of the nationwide high-voltage grid, the backbone of electricity transmission. They transmit electricity continuously from electricity generating companies to distribution network companies and industrial companies.
