Intellitek Systems Announces Flat-Rate, Full-Service Payroll

The company will offer self-service portal, tax processing and direct deposit for unlimited employees at no extra cost...

Fort Wayne, IN; March 1, 2013- Fort Wayne-based Intellitek Systems, North America's first company to deliver fixed-cost, no user-fee ERP software today announced it is extending its revolutionary pricing model to the full-service payroll industry. The company will charge a fixed monthly fee for payroll processing, including direct deposit and tax management for unlimited employees. Intellitek Systems is offering introductory pricing of \$249 per month plus a one-time set up charge (which varies based on technology platform options that clients choose) to clients who sign up prior to April 15, 2013.

In announcing the new service, Matthew May, Intellitek Systems' founder and CEO stated, "Payroll companies share a nefarious commonality with enterprise software vendors; they are making outrageous margins on unnecessary per-employee fees. The Intellitek team is very proud of our work over the past 5 years to revolutionize the way small and mid-market companies purchase enterprise software, and we look forward to now redefining the full-service payroll industry."

For more information, contact Matthew May, company president, at 1-(866)-314-7050 Ext. 101 or via email at matthew.may@intellitkeys.com. Intellitek Systems can be found on the Web at <http://www.intellitkeys.com>.
