

## **New interim phase IIa data on simeprevir in combination with other DAAs will be presented at the upcoming EASL AASLD Special Conference**

**Stockholm, Sweden — Medivir AB (Nasdaq Stockholm: MVIR)** today informs that new clinical data from an ongoing phase IIa study of simeprevir, odalasvir and AL-335, being conducted by Alios BioPharma Inc., part of the Janssen Pharmaceutical Companies of Johnson & Johnson (Janssen), will be presented at the European Association for the Study of the Liver (EASL)/American Association for the Study of Liver Diseases (AASLD) Special Conference entitled “New Perspectives in Hepatitis C Virus Infection – The Roadmap for Cure”. The conference will take place in Paris, France, on September 23<sup>rd</sup> and 24<sup>th</sup> 2016. The ePoster presentation, entitled “Short duration treatment with AL-335 and odalasvir (ODV), with or without simeprevir (SMV), in treatment naïve patients with hepatitis C virus (HCV) genotype (GT) 1 infection”, will be made on Friday September 23<sup>rd</sup>. It will include interim data which aims to establish the safety, pharmacokinetics and efficacy (SVR12) of different combination regimens consisting of three directly acting antiviral agents (DAAs), simeprevir, odalasvir, an HCV NS5A inhibitor, and AL-335, a nucleotide inhibitor of the HCV NS5B polymerase, for the treatment of GT 1 HCV infection in eight weeks or less. Further information about the study is available at [clinicaltrials.gov/show/NCT02569710](http://clinicaltrials.gov/show/NCT02569710).
