

Singapore IT Disposition Services Continue to Develop for Sims Recycling Solutions

New site with additional square footage will help grow IT asset disposition service offerings in Asia

Sims Recycling Solutions, [a leading provider of global IT asset disposal \(ITAD\) services](#) is excited to announce their recent move to a new site in Singapore. This move is a result of "simply outgrowing the original site," as stated by Sean Magann, vice president of Sims Recycling Solutions. The new location will allow Sims to keep up with increased demand for integrated and global ITAD solutions.

"As leaders in the industry we will continue to develop and expand our ITAD services across the globe in an effort to better accommodate our customer's current and future needs," stated Steve Skurnac, president of Sims Recycling Solutions. "The experienced personnel and processes at this location are a large part of the region's success and have contributed to the sustainability of this site since incorporation in February of 2008."

Sims Recycling Solutions was recently positioned in the "Leaders" quadrant for the second year in a row in the Magic Quadrant for IT Asset Disposition evaluation, a report which assesses and compares all international ITAD vendors. This report was researched by Rob Schafer, and distributed in December 2014 by Gartner, Inc., the world's leading IT research and advisory company.
