About Cantargia

Cantargia AB (publ), reg.no. 556791-6019, is a biotech company that is developing antibody-based treatments for life threatening diseases. The original discovery by the research team behind Cantargia was the overexpression of a specific target molecule, interleukin 1 receptor accessory protein "IL1RAP", in leukemia stem cells, later research has also identified IL1RAP in a large number of other forms of cancer. The lead compound, CAN04 directed against IL1RAP, will be investigated in the CANFOUR phase I/IIa clinical trial in with primary focus on non-small lung cancer and pancreatic cancer. CAN04 has a dual mechanism of action, it blocks IL1RAP function and stimulates the immune system to eradicate tumor cells. Cantargias second project is in discovery phase with the goal to develop an IL1RAP binding antibody optimized for therapy of autoimmunity and inflammatory diseases.

Cantargia is listed on Nasdaq Stockholm First North (ticker: CANTA). Sedermera Fondkommission is the company's Certified Adviser. More information about Cantargia is available at <http://www.cantargia.com>.
