

## Flowcrete Canada Marks New Era of Growth with the Opening of New Warehouse & Distribution Center in Vancouver, BC.

Flowcrete Canada is delighted to announce the opening of a new Warehouse and Distribution Center located just outside of Vancouver in Pitt Meadows, BC.

This move is designed to meet the increasing demand for the company's [specialty resin flooring solutions](#) and enable continued sales growth in the Western Canada region, having outgrown the previous facility.

The new 4,000 sq ft center will serve as a regional hub for the distribution of [Flowcrete Americas'](#) polymer flooring materials and specialty coatings; increasing capacity, enabling a broader product mix to be stocked and delivering reduced lead times for local customers.

The company's investment into improving infrastructure and logistics in the region also sees a new hire to support the new facility, Byron Laus - Warehouse Supervisor.

Byron has a wealth of experience in warehouse inventory management and is familiar with Flowcrete product having previously worked with several of Flowcrete Canada's applicator partners in the BC area.

Speaking of the new facility, [Ben Smith Country Manager for Flowcrete Canada](#) said: "I'm delighted that Flowcrete has chosen to invest in the Western Canada region. The new Warehouse & Distribution Center will greatly improve the service we are able to offer our customer network, allowing us to ship product quickly and efficiently."

Flowcrete Americas' Vice President, David McNeece, cut the ribbon on the new Warehouse and Distribution Center on August 18th at a celebratory event, in which local coatings applicator customers were invited to tour the new facility.
