

Disinfectants with a Clean Agenda™

SANOSIL INTERNATIONAL NAMES QUIP LABORATORIES EXCLUSIVE DISTRIBUTOR IN LIFE SCIENCES SECTOR

New Castle, DE (January 22, 2014) --- Sanosil International, manufacturer and marketer of room and surface disinfectants and industrial biocides, today named Quip Laboratories of Wilmington, DE its exclusive U.S. distributor in the life sciences sector, which includes pharmaceutical research and development and production, medical research facilities and vivariums.

David St. Clair, chairman of Sanosil International, said, "Quip Laboratories will help us quickly expand availability of Sanosil disinfectant products throughout the life sciences sector in the United States. Sanosil International disinfection products kill 99.99% of most viruses, bacteria and fungi, answering a real need in pharmaceutical R&D and production facilities, medical research facilities, vivariums and elsewhere. We expect that Quip will play an important role in helping grow our business in these markets."

St. Clair said Sanosil selected Quip for its expertise in logistics, customer and sales service, technical expertise and a 30-year record of sales success.

"Quip Laboratories is very pleased to add Sanosil to the roster of innovative biosafety product technologies for which we are renowned," said Tim Hidell, Quip's President. "This exclusive partnership recognizes both Quip's role as a leader in biosafety and Sanosil's excellence in product innovation and performance. We are proud of this partnership," Hidell said, "and we are confident that the addition of the Sanosil products to our portfolio will facilitate their broad adoption across North America."

About Sanosil International

Sanosil International is a privately held company based in New Castle, Delaware. Sanosil International maintains the exclusive manufacturing and marketing rights for Sanosil biocide for much of the world, secured from the inventor and patent holder, Sanosil Limited of Switzerland. The Sanosil formula has patents filed worldwide. The efficacy of Sanosil products is endorsed by customers worldwide and supported by over 200 independent tests and numerous government approvals.

The Sanosil formula is based on a unique stabilization process that blends hydrogen peroxide and ionized silver to create a broad-spectrum solution for killing germs. Sanosil International's Halo Disinfection System has been approved by the United States Environmental Protection Agency. More information can be found at www.SanosilGlobal.com

About Quip Laboratories
