Alfa Laval wins SEK 85 million energy efficiency order

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order to supply Alfa Laval Packinox heat exchangers to a refinery in the US. The order has a value of approximately SEK 85 million. It is booked in the Welded Heat Exchanger unit of the Energy Division, with deliveries scheduled for 2019.

The order comprises compact heat exchangers for energy recovery in a chemical process, where low octane refinery naphtha's are converted into high-octane liquid products.

“I am happy about this order for our energy-efficient and compact heat exchangers,” says Susanne Pahlén Åklundh, President of the Energy Division. “These reliable and highly energy-efficient products play a vital role in recovering energy thus contributing to huge energy savings in many different industries not least in refinery and petrochemical applications.”

Did you know that... an Alfa Laval Packinox heat exchanger is more efficient and compact than traditional technologies and one can replace up to four shell-and-tube heat exchangers in this type of application?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and
