

Vote Sweden to European Environment Champion

OrganoClick has been named National Champion for Sweden in The European Business Awards; Europe's largest business competition, set up to celebrate business excellence and best practice in the European business community. Now it is time to VOTE to put Sweden on the European map of eco-friendly companies and to inspire the rest of the world to innovate with environmentally friendly alternatives.

After winning National Champion Sweden, OrganoClick now represents Sweden in the category of environmental & corporate sustainability in the Public Voting competition. This requires the National Champions in each country to make a presentation video, telling their unique story and explaining their business success. The public will watch the videos and vote for their favorite.

To Vote for Sweden's National Champion; OrganoClick - please visit:

<http://www.businessawardseurope.com/vote/detail-new/sweden/20367>

The public voting is open from 9th January 2017 and until 1st March 2017.

OrganoClick was internationally recognized for its research and development of alternative chemical technologies to replace environmentally harmful chemicals currently in use in fiber based materials. In addition, OrganoClick has successfully taken its products to market with a rapid international sales growth. OrganoClick was chosen from 33.000 businesses, by an esteemed panel of judges made up of European business and political leaders, academics and entrepreneurs, to represent Sweden in the category of environmental & corporate sustainability.

"We really want to put Sweden on the European map of eco-friendly companies in the frontline. It is with great hope for the public votes that we head for the champion title. We want to inspire the world to make great business with environmentally friendly solutions!", says Mårten Hellberg, CEO OrganoClick.

OrganoClick is a Swedish cleantech company that develops, produces and markets functional materials based on environmentally friendly fiber chemistry. Examples of products that are marketed by OrganoClick are the water-repellent fabric treatment OrganoTex®, the flame and rot protected wooden material OrganoWood® (through the subsidiary company OrganoWood AB) and biobased binders for nonwoven materials. OrganoClick was founded in 2006 as a commercial spinoff company based on academic research examining the modification of biofibers performed at Stockholm University and the Swedish University of Agricultural Sciences.
