

OrganoWood AS enters distribution agreement with Alanor.

OrganoClick's subsidiary OrganoWood has signed a general agreement with Alanor AS. The agreement regards sales and distribution of OrganoWood's products for surface treatment of wood for the Norwegian market.

- "Alanor is proud to be selected by OrganoWood to promote and distribute OrganoWood's environmentally friendly surface treatment products in Norway. Today Alanor supplies its products to all major wholesale platforms in Norway: Optimera, Løvenskiold, Farveringen, Jernia and Coop." says Audun Klausen, CEO Alanor AS.

OrganoWood's wood products have been manufactured and marketed in Sweden since 2011.

The OrganoWood® wood protection system consists of 3 products:

- ~ **OrganoWood® 01. Protection:** Rot & Flame protection.
- ~ **OrganoWood® 02. Repellent:** Super hydrophobic Dirt & Water repellent protection.
- ~ **OrganoWood® 03. Cleaner:** Organic Wood Cleaner.

OrganoWood's wood products were the first wood products in Sweden to be awarded the Swedish Society for Nature Conservation environmental labelling "Good Environmental Choice".

Currently OrganoWood has distribution agreements for its wood protection system in many of the European countries. This has proven to be an expansion strategy that works very well.

- "Today we sell OrganoWood's modified wood in Norway through retailers like Optimera, Byggmakker and Maxbo. It is important that we reach out as wide with our surface treatment products and through close cooperation with such a well-established distributor as Alanor, we are convinced that we will succeed." says Jens Hamlin, CEO OrganoWood AB.
