

The Delta4 Discover, a 4D in-vivo dosimetry system from ScandiDos, is now approved for use by Varian Medical Systems on TrueBeam® and Clinac® Systems

ScandiDos AB and Varian Medical Systems have completed verification and validation of the Delta4 Discover system for use on TrueBeam and Clinac iX radiotherapy systems.

UPPSALA, Sweden – ScandiDos AB (NASDAQ OMX First North: SDOS), a global leader in Quality Assurance (QA) and dosimetry for modern radiation therapy, now offers complete verification for IMRT and RapidArc® using Varian's TrueBeam® and Clinac® iX Radiotherapy systems with its Delta4 Discover system, an independent and real-time 4D in-vivo dosimetry solution.

“We are pleased to be the first dosimetry company that offers high quality, independent verification during treatment to Varian users and simultaneously save the clinics precious time performing quality assurance” says ScandiDos CEO Görgen Nilsson.
