

Advenica has taken yet another order of the N3 approved data diode

A Swedish authority has placed an order for Advenica's data diode which is classified up to and including level SECRET/TOP SECRET.

Advenica's data diodes were approved in October 2016 by the Swedish Armed Forces with the component assurance level N3 which made Advenica's data diodes the only approved diodes at this level. The customer, who is a Swedish authority, has placed a smaller order worth less than SEK 500,000 and the order will be delivered during the second quarter of 2017.

This is yet another order placed on our data diodes within a short amount of time. We see that the approval of the data diodes is beginning to have an impact, and this transaction is a confirmation that our solutions meet the highest possible requirements to ensure the integrity and confidentiality of a solution.

Einar Lindquist, CEO, Advenica AB

Advenica's data diodes is a robust solution made in Sweden that ensures unidirectional data traffic, preventing sensitive information from being transferred in the opposite direction.
