

## FMV orders more cybersecurity products

The Swedish Defence Materiel Administration (FMV) has purchased more products from Advenica's Cross Domain Solutions portfolio to a value of over half a million SEK.

FMV has placed an order on Advenica's data diode. The product has previously been sold to customers within both Critical Infrastructure and Authorities in Sweden and abroad. Delivery is planned for the second quarter of 2017.

*We at Advenica are proud to deliver our cybersecurity solutions to FMV. For many years, we have had a good relationship based on trust and we look forward to continue our cooperation.*

*Einar Lindquist, CEO, Advenica AB*

The data diode protects sensitive information by ensuring that the information can only travel in one direction, which is primarily used when lower security-class networks send information to secure networks.
