

Advenica achieves success in the East – signs orders worth approximately SEK 600 000

Advenica has grown on the international market. Now the establishment in Helsinki is followed by winning three orders, worth approximately SEK 600 000.

Advenica is growing on the international market and the establishment in Helsinki has been followed by successful business. A clear result of an investment in solutions addressing difficult information security challenges. The orders, placed on both products and services, have opened for further dialogue and are of great importance to Advenica in Finland and the execution of the business strategy work.

This proves that the importance of being locally present is crucial to achieving the confidence required within cybersecurity. The new customers represent different types of industries, which makes it an even bigger success for Advenica's office in Finland.

Einar Lindquist, CEO, Advenica AB

The key to success is that the provided solutions and services can be customized for customers' unique applications in a simple way without compromising the security. The customers, who act in the area where high information security is critical, cannot be named as it is crucial for the execution of the transactions.

The order value is approximately SEK 600 000 and will be delivered during the second and third quarter of 2017.

It is amazing that very important customers and partners have responded quickly and positively to Advenica's establishment in Helsinki and that they see the value of our unique solutions and services. These are the initial orders required to establish a long-term business in Finland.

Mikael Puska, CEO, Advenica Oy
