

A Swedish international industrial corporation chooses Advenica – order worth MSEK 0.6

The Swedish developer and manufacturer of cybersecurity solutions, Advenica, has signed an order on Cross Domain Solutions and support services.

The order value is MSEK 0.6 with delivery before the turn of the year. Cross Domain Solutions enables a strictly controlled and filtered exchange of information between networks that usually are not connected due to different security levels. The products ensure that only information defined in an information security policy can be sent between the various security zones.

The agreement with the Swedish industrial corporation is yet an achievement for Advenica, whose goal is to expand in business and critical infrastructure. The customer in question provides security products, services and solutions globally.

By meeting very high information security demands and providing for specific cybersecurity solution needs, we can contribute to continued development of our new customer and long-term to safer society.

Einar Lindquist, CEO Advenica AB
