

Advenica receives MSEK 1.5 order from customer in the Finnish public sector

The European provider of cybersecurity solutions moves forward in Finland, with an order worth MSEK 1.5.

Advenica has received another significant order for 2018 from the Finnish public sector. The new order is placed on products, with delivery during Q1 this year. The nature and circumstances of the industry regarding the delivery and the customer means that further information about the customer will not be published.

Advenica established offices in Helsinki late 2016, and the market responded promptly and positively. This latest order furthers business, focusing on the public sector.

It's a great feeling to be able to take another important step into the public sector in Finland. This confirms yet again that Advenica's offer is right. We'll continue forward, with the ambition to keep up our growth pace.
