
ERICSSON AND MÁSMÓVIL SIGN STRATEGIC AGREEMENT FOR CORE NETWORK EVOLUTION AND MANAGED SERVICES

- Includes core network evolution based on NFV, enterprise billing, managed and systems support services, and deployment, installation and maintenance of fiber to the home
- Enhances MÁSMÓVIL's ability to provide innovative and flexible service bundles and billing to enterprises, as it brings state-of-the-art technology to their network
- Ericsson will also provide rollout, installation and maintenance services related to MásMóvil's FTTH network

Ericsson (NASDAQ: ERIC) has been selected by fourth-largest Spanish operator MÁSMÓVIL to provide a wide array of solutions and services, including core network evolution based on Network Functions Virtualization (NFV), enterprise billing, managed and systems support services, and deployment, installation and maintenance of fiber to the home (FTTH).

Through this agreement, MÁSMÓVIL subscribers gain access to an improved consolidated network and new services such as Voice over LTE, Wi-Fi calling and fixed VoIP for residential and enterprise use. The unified management of the mobile network and the integration of technology by a single vendor will enable top quality standards for Spanish users.

Meinrad Spenger, CEO of MÁSMÓVIL, says: "The strategic agreement with Ericsson is a clear demonstration of our investment character to continue improving and updating our fixed and mobile networks with the unique objective of offering our customers the best telecommunications products and services."

José Antonio López, Head of Ericsson Spain, says: "In addition to introducing a range of new services for home customers, this agreement makes it possible for MÁSMÓVIL to provide innovative and flexible service bundles and billing to enterprises. The support services and managed services portions of the contract will ensure that services are delivered with the utmost quality, according to agreed key performance indicators."

The solutions in scope for core network evolution include Subscriber Data Management, Policy Control and Charging Rules Function, a complete virtual IP Multimedia Subsystem for mobile, fixed and enterprise communication services, Wi-Fi Mobility Gateway for Wi-Fi

calling, and Diameter Signaling Controller. MÁSMÓVIL's enterprise billing capabilities will be enhanced with the provision of a new, unified B2B billing system.

MÁSMÓVIL has extended its existing managed and systems support services contracts until the end of 2019, and has the option of extending their scope to include its fixed network.

FTTH deployment, installation and maintenance services from Ericsson will increase MÁSMÓVIL's ability to continue offering a convergent fixed-mobile competitive offering to the Spanish market.

All of the solutions and services being provided are best-in-class and proven in deployments worldwide, enabling MÁSMÓVIL to benefit from Ericsson's extensive experience and gain access to innovative new features as they are introduced to market.
