

SmartFile Appliance Information

Time saving pre-configured hardware that allows for secure file management, storage, and sharing on your network. For organizations that need an on-premise solution without the hassle of supporting it.

Setup & Maintenance

Ensure rapid adoption with dedicated support representative, hardware setup, custom help videos, and training webinars. Also included is hardware maintenance and on-going software updates. With next-day on-site maintenance.

Compliance & Security

Keep your files inside your network. Use your security protocols and SmartFile 256-bit encryption at rest and at transfer. You can define file, folder, and user permissions to add another level of security.

Branding & Integrations

Use your company logo, colors, and sub-domain to customize and brand your application. Use the Microsoft Outlook Add-In, desktop sync client, or create new integrations through the API.
