

WORLD PELLETS 2012

– THE 3RD WORLD CONFERENCE ON PELLETS

PART OF

WORLD BIOENERGY 2012
Exhibition & Conference on Biomass for Energy
29 - 31 MAY 2012, JÖNKÖPING - SWEDEN

FIRST ANNOUNCEMENT AND CALL FOR PAPERS

CALL FOR PAPERS AND PRESENTATIONS

Building on previous successes, World Pellets 2012 – the 3rd World Conference on Pellets – is once again an integrated part of the World Bioenergy 2012. It will feature the whole production chain – raw materials, production, and end use – as well as certification, standardisation, trade, and market development.

Today, pellets and other densified biomass, is already a fuel of worldwide importance. The use of pellets is expected to increase significantly in the coming years, with positive effects for the environment, local employment and the security of energy supply.

Such growth requires that the market actors meet and exchange experiences regularly, update their technology know-how and inform themselves on the economic and political frameworks. Moreover, it is important to see and study good examples ("show-how") and to talk to operators of commercial plants ("hands-on").

World Pellets 2012 will provide you with all these opportunities. Take part in our international business forum or update yourself on the latest research into the whole chain, from raw material handling, pellet production and logistics to pellet combustion and energy generation.

World Pellets 2012 is the third major world event on pellets and densified biomass fuels. The last occasion was also in Jönköping where approximately 500 delegates gathered from all over the world. This time the conference is an integrated part of World Bioenergy 2012, which will give you excellent opportunities to network across borders. Could there be a better place to meet than in the world leading pellet country?

MAIN TOPICS

- International pellet trade
- Innovative pellet production systems

- New small- and medium scale pellet combustion technologies including heat recovery
- Innovative and efficient large scale combustion technologies for pellets
- Reduction of fine particulate emissions from pellet combustion
- Torrefied pellets and their storage, handling and combustion properties
- Health and safety aspects of pellet production, transport and storage
- Non-wood pellets – characterisation as well as status of production and utilisation
- Raw material potentials on a global scale
- Systems for pellets and densified fuels in new markets

Featuring trade fair, study visits, match-making, and a conference, World Bioenergy and World Pellets 2012 is the meeting point for those who want to stay, or become, part of the fast-growing global bioenergy community.

Welcome to Jönköping!

Tomas Käberger
Chairperson of World Bioenergy 2012 conference
Executive Board Chair, Japan Renewable Energy Foundation

WELCOME TO SUBMIT YOUR ABSTRACT

We are currently soliciting papers for World Pellets 2012 and World Bioenergy 2012. If you are interested in presenting a paper, please visit www.worldbioenergy.com for more information about topics and submission guidelines.

IMPORTANT DATES:

Final date for submission of abstracts: **1 December 2011**

Notification of authors:

16 January 2012

Final date for submission of full papers: **16 April 2012**

INTERNATIONAL TRADE FAIR

International fair visitors and conference delegates come to World Bioenergy to meet people who can help them transform their visions into profitable production. Can you help them?

As an exhibitor here you have superb opportunities to present your products and services in context.
