Press Release

David Filipsson appointed Chief Commercial Officer of SSC

Stockholm, Sweden – 11 February 2025

David Filipsson has been appointed Chief Commercial Officer of Swedish Space Corporation, SSC. He will take office on April 1 and be part of the Executive Committee. In the new role as CCO, he will play a critical role in commercializing SSC, driving sales excellence and securing achievement of group financial targets.

As CCO, David Filipsson will have a broad range of responsibilities and collaborate closely with all divisions and geographies. He will develop and implement the company's overall commercial strategy, lead Sales Excellence initiatives to enhance sales performance and efficiency, establish and oversee contract management, and develop pricing strategies. As CCO, he will also collaborate with product development and customer service teams to align commercial goals with overall business objectives. The role also includes the areas of Strategy, Public & Governmental Affairs, Defense Affairs, Sustainability, and Marketing.

"There are vast opportunities for SSC in the fast-growing and developing global space market. I'm very much looking forward to working with a great team and contributing to taking the next steps in advanced space services and building SSC's position in the market," says David Filipsson.

David has broad experience from different leadership roles at Ericsson across sales & commercial management, business development and strategy. Most recently, he has led global commercials for Ericsson's Dedicated Networks offering, bringing 5G and private networks to industries such as manufacturing, energy and mining.

"I am thrilled to welcome David Filipsson to SSC. His extensive experience and proven track record in global business development and sales make him an invaluable addition to our company in this new role," says Charlotta Sund, President and CEO of SSC.

David Filipsson will take office on April 1, 2025.

About SSC

SSC (Swedish Space Corporation) is a leading global provider of advanced space services, with more than 50 years of experience. We help space organizations, research institutes, commercial and institutional actors from all over the world to get access to space. With local presence on all continents and about 700 committed employees, we offer specialist expertise in satellite communications and satellite control services, spacecraft operations, rocket and balloon systems, launch services and flight test services, as well as engineering, operations and consultancy services for space missions. We enable successful space projects within Earth observation, telecommunications, security, meteorology, navigation and positioning, scientific research and other applications. Among our strongest assets are Esrange Space Center in northern Sweden, set out to become first to launch satellites from mainland Europe, as well as one of the world's largest commercial ground station networks for satellite communications.
