# **SSC Strengthens Presence in Japan – Establishes Office in Tokyo**

Stockholm, Sweden – 8 July 2025

**Swedish Space Corporation (SSC) is proud to announce the establishment of an office in Tokyo, Japan. This strategic move marks a significant milestone in SSC’s long-term commitment to the Japanese space market and strengthens its presence in one of the world’s most dynamic space ecosystems.**

“We are excited to deepen our engagement with the Japanese space community by establishing a permanent presence in Tokyo,” says Charlotta Sund, CEO of SSC. “This move reflects our dedication to supporting satellite operators and partners in the Space industry across the region with even greater proximity and collaboration.”

With over 40 years of experience serving the Japanese market, SSC has built strong relationships with key stakeholders, including the Japan Aerospace Exploration Agency (JAXA) and leading commercial satellite operators.

## **A Natural Next Step**

SSC’s ambition is to become an integral part of the Japanese space ecosystem. By establishing a local presence, SSC aims to enhance its ability to deliver high-quality services and build even stronger long-term partnerships in Japan.

“The new office will enable SSC to work even more closely with its customers, better understand their evolving needs, and co-develop innovative solutions tailored to the region”, continues Charlotta Sund.

## **Building on Strong Foundations**

Since 1983, SSC has been a trusted partner to the Japanese space sector. The establishment of an office in Tokyo is a natural progression of this legacy, reinforcing SSC’s role as a leading global provider of advanced space services.

**About SSC:** Swedish Space Corporation (SSC) is a leading global provider of advanced space services, with more than 50 years of experience. We help space organizations, research institutes, commercial and institutional actors from all over the world to get access to space. With local presence on all continents and about 700 committed employees, we offer specialist expertise in satellite communications and satellite control services, spacecraft operations, rocket and balloon systems, launch services and flight test services, as well as engineering, operations and consultancy services for space missions. We enable successful space projects within Earth observation, telecommunications, security, meteorology, navigation and positioning, scientific research and other applications. Among our strongest assets are Esrange Space Center in northern Sweden, set out to be a leading provider of satellite launch services from mainland Europe, as well as one of the world’s largest commercial ground station networks for satellite communications.
