

## PRESS RELEASE

November 16, 2017

# Enea provides update regarding dispute with large customer

As previously communicated, Enea has initiated arbitration proceedings with one of the company's largest customers regarding how to interpret the provisions on royalty calculation in the contract governing the use of Enea's OSE operating system in the customer's telecommunications equipment. See initial press release on November 3, 2016. As further announced, the dispute has subsequently extended to also include a one-sided price reduction that the customer is introducing.

The arbitration proceedings regarding the initial dispute have now been completed and an arbitral award is to be rendered no later than February 28, 2018. The award may, however, be rendered earlier. The dispute regarding the customer's one-sided price reduction could not be brought within the scope of the proceedings now completed but is handled separately. Enea expects to have to initiate arbitration proceedings also for this part of the dispute.
