

PRESS RELEASE

Enea signs Agreement for Embedded DPI worth 2.8 MUSD

Stockholm, Sweden, June 13, 2019 Enea® (Nasdaq Stockholm: ENEA)

Enea has signed an agreement with a total value of 2.8 MUSD over two years, covering embedded Deep Packet Inspection (DPI) technology for a US-based market leader in cloud technology and SD-WAN solutions for enterprises.

The deal, which is part of Enea's expected business volume, includes both software licenses as well as associated support and maintenance. Revenues are recognized over 2019 and 2020, starting with 0.9 MUSD in Q219.

The agreement covers Enea's Qosmos ixEngine, which is a DPI-based classification and metadata engine that recognizes over 3,200 protocols and can extract over 5,000 metadata.

Qosmos ixEngine will be embedded inside a networking solution and will provide detailed understanding of network traffic, used for applications such as WAN optimization, Quality of Service (QoS), firewalling, and reporting.

"This confirms Enea's position as the leading provider of DPI technology for the SD-WAN market," said Jan Häglund, President and CEO of Enea.
