(NASDAQ First North: DOME)

Dome Energy gives production update for April and drilling update from Illinois Basin

[Dome Energy AB](#) (publ) (herein after “Dome” and/or “the Company”) provides production update for April 2018, in which the Company produced 1,049 BOEPD before royalties, and drilling update from Illinois Basin.

- Production up 43% from June 2017, adjusted for sold assets post June 2017
- Dome Energy produced 1,048 BOEPD before royalties in the month of April. Certain accruals have been made based on delayed revenue from non-operated assets.
- All six recently drilled wells are now completed and producing
- Peak production is expected during May and June 2018

Paul Morch, CEO: “We are proud to announce our production numbers for the month of April. The drilling program in the Illinois Basin is now complete, and we expect our “peak” production during May and June. We are continuing our organic growth, as shown in the chart below, which has been adjusted for all assets sold, and previously made accruals. Our BOEPD has increased some 43% from June 2017 to April 2018. All of this increase has come from pure oil production, adding more than 10,000 barrels of oil per month. We will continue our drilling after the summer, and we will update on specifics regarding the program.”
