

Press release

Stockholm July 20, 2018

(NASDAQ First North: DOME)

Dome Energy gives production update for June 2018 showing a of daily production to 1,075 BOEPD

[Dome Energy AB](#) (publ) (herein after “Dome” and/or “the Company”) provides production update for June 2018, showing a daily production to 1,075 BOEPD before royalties.

Paul Morch, CEO: “We are happy to announce our production numbers for the month of June, which showed a daily production average of 1,075 BOEPD. As mentioned in the previous production press release, peak production in the Illinois Basin was 600 BOPD. Production has started to decline slightly from the new wells and we expect a drop in the production in July as we convert some of our submersible pumped wells to rod pumps. We anticipate production to stabilize in early August when these workovers are completed. We expect to start the next drilling program during the fall.”
