

## Press release

Stockholm August 27, 2018  
(NASDAQ First North: DOME)

### Dome Energy gives production update for July 2018 and commences third round of drilling in the Illinois Basin

[Dome Energy AB](#) (publ) (herein after “Dome” and/or “the Company”) provides production update for July 2018, showing a daily production to 940 BOEPD before royalties.

Paul Morch, CEO: “We are proud to announce our production numbers for the month of July of 940 BOEPD. Production declined due to downtime associated with artificial lift conversions and routine workovers in the Illinois Basin. We are very pleased with the performance of the wells to date, we expect the wells to perform similarly to our type curve.

We are also happy to announce that work has commenced on the first location for our fall drilling program and we expect to commence drilling by the end of September 2018. We will present the program and our targets before we start drilling.”
