

Mycronic makes upgrade on already ordered Prexision mask writer

Täby, 27 February, 2017 - Mycronic AB (publ), has received an order to upgrade an advanced mask writer from the Prexision series for display applications. The upgrade will be delivered when the ordered mask writer is delivered during the first half of 2017.

Mycronic offers mask writers for the manufacturing of photomasks within different fields of application. These areas are display manufacturing (for TV, smart phones and tablets among other things) and applications within the multi-purpose market, a broad segment comprising many different application areas.

"In 2016, the customer placed an order for a Prexision-8 mask writer, with functionality equal to manufacturing of Generation 6 photomasks, with the possibility to upgrade the system later," says Magnus Råberg, Senior VP & General Manager for business area PG at Mycronic AB. "With this additional order the customer receives functionality, such as a larger stage among other things, that makes the system a full scale P-8," Magnus Råberg concludes.
