

Mycronic receives order for a Precision Lite 8 Evo

Mycronic AB (publ) has received an order for a Precision Lite 8 Evo, for deployment in Asia. The order value is in the range of USD 6-9 million. Delivery of the system is planned for the second quarter of 2023.

Precision Lite 8 Evo is designed to meet the requirements for cost-efficient production of photomasks for mainstream displays up to G8 mask size. The order for the Precision Lite 8 Evo mask writer is to replace one of the customer's older systems.

"Despite the clear trend towards more advanced photomasks for displays, the market for less complex photomasks remains significant and important. We appreciate the opportunity to deliver the modern Precision Lite 8 Evo to replace one of the customer's older systems." says Charlott Samuelsson, Sr VP Pattern Generators at Mycronic.

Mycronic provides mask writers for manufacturing photomasks in several fields of application. These include display manufacturing (TVs, smartphones and tablets), production of semiconductors and applications in the multi-purpose market, a broad segment that comprises many different areas of application.
