

Press release, 2017-06-01

## **Aventus NowCast™ service now deployed across the easyJet fleet**

The Board of Directors of AVTECH Sweden AB (publ) ("AVTECH" or "The Company") today communicates the following business update:

AVTECH and easyJet, one of Europe's leading airlines, has agreed to proceed with deployment of AVTECH's Aventus NowCast™ wind uplink service to the full fleet of easyJet, including both Swiss- and UK-based aircraft. The decision follows the positive outcome of recently performed product evaluations.

Aventus NowCast™ has been in use within easyJet's Swiss-based fleet since 2016 and upon demonstrating the contracted fuel saving targets, a deployment of the end-to-end solution to the complete easyJet fleet is now given a go-ahead.

"We are delighted to have easyJet as an AVTECH customer and thrilled about our future cooperation", says Soren Skog, Marketing Director at AVTECH. "The first phase has taken a bit longer than expected to complete, but both easyJet and AVTECH have made strong efforts to reach a successful completion", he continues.

"We welcome easyJet's decision to implement Aventus NowCast™ in their fleet. This is another confirmation that the Aventus product supports our customers' efforts to reduce fuel consumption and CO<sub>2</sub> footprint", says AVTECH CEO Christer Fehrling. "We are certain Aventus will contribute to make easyJet's operations even more efficient", he concludes.

"After a careful selection process, we are very happy to start a fleet-wide deployment of the Aventus service," says Brian Tyrrell, Head of Flight at easyJet. "AVTECH has proven themselves as a reliable supplier to easyJet, and by today's decision we show that we are very comfortable in knowing that Aventus NowCast™ brings definite benefits to our operations", he concludes.

The decision to implement Aventus NowCast™ with the full easyJet fleet is made under the agreement signed in 2016. The fleet-wide rollout is expected to take a number of months.

### **About Aventus NowCast**

The Aventus NowCast system is a unique and patented system that enables accurate wind information and/or 4-Dimensional Trajectories for flights, making use of the very best in atmospheric modeling combined with weather information to create high resolution wind models and wind data packages for the different segments of a flight; a so called NowCast. Data packages are uplinked to aircrafts to enable the onboard Flight Management Systems (FMS) to accurately calculate an optimized flight profile and an accurate time when each waypoint of a flight will be reached. The immediate benefits of Aventus NowCast are airline fuel- and CO2 savings, i.e. the solution is highly environmentally friendly. It is also imperative for Time-based operations in aviation, which is an area where Aventus NowCast provides an even larger overall financial and environmental benefits through the provision of increased efficiency and punctuality of individual flights.

### **About AVTECH Sweden AB (publ)**

AVTECH develops products and services for digital air traffic management systems. Customers are the global aviation industry's various players, such as airlines, airports, aviation, technology companies and aircraft manufacturers. With the help of the company's products and services, each individual flight or entire flight operation can be optimized in terms of economy, noise and emissions, efficiency, punctuality and safety. The head office is located in Stockholm / Kista. AVTECH Sweden AB (publ) is listed on NASDAQ OMX First North and has appointed Redeye AB, tel: 08-545 013 30, to the Certified Adviser.
