

ONLINE PRESS RELEASE

Title: T.E.N. Announce Exclusive Equine Joint Supplements Promotion

Title: With competition season nearing, Team T.E.N. has introduced a seasonal joint care offer to ensure both horse and owner are prepared for the challenges ahead. Buy one product from the equine joint supplements range and get a second half price. Enter the code 'JOINTCARE' at the checkout between Monday 23rd February and Sunday 8th March 2015 to take advantage of the offer.

The comprehensive [**T.E.N. Supplements**](#) equine joint range has been designed to meet the individual needs of your horse or pony. Joint problems can impede performance and cause discomfort for the horse. The T.E.N. joint supplements for horses range includes four especially targeted formulas including Healthy Joints, Challenged Joints, Senior Joints and Growing Joints and Bones.

Not sure which joint supplement is best for your horse? T.E.N. Challenged Joints is perfect for active ponies and horses who may have some joint stiffness. T.E.N. Healthy Joints is the ideal option for maintaining general joint health. T.E.N. Senior Joints and T.E.N. Growing Joints & Bones are especially formulated to offer additional support at important life stages.

As we transition into spring and summer, now is the best time to assess your horse's diet and to prepare for the increased workload which competition season presents. T.E.N. Supplements are offering customers a fantastic promotion to ease joint wear and tear for every horse and pony.

Customer Wilma Manchon has been giving T.E.N. Challenged Joint supplement to her 23-year-old mare who has arthritis affecting her hocks. She comments: '*She no longer has Bute and has become freer in her movements.*'

Fellow customer Sarah Thorpe, meanwhile, has found that T.E.N. Senior Joints has supported her daughter's pony after she suffered a tendon injury. Sarah said: '*She's now jumping again. I really think it's helped!*'

T.E.N. is committed to helping both horses and their owners by providing a wide range of products available exclusively online. Team T.E.N. are horse owners themselves and are passionate about horse health and the integrity of the ingredients used in the products, together with its unique reputation for total transparency of ingredients.

Notes for the Editor:

The T.E.N. Supplements brand challenges itself to devise a strongly targeted range of high performance supplements for horses, designed to meet varied and individual needs.

The brand's product line offers something for all stages of life. Young and growing foals often benefit from additional joint support, whereas performance horses may need help with challenged joints, and older horses need supplements for senior joints.

Every supplement uses carefully chosen and researched ingredients, selected for their safety and efficacy. Customers say that they see and experience a significant difference in their horses' and ponies' health, appearance and zest for life.
