

Coeli Asset Management expands its equity offering with the launch of the Coeli Global Select Fund

The Global Select Fund consists of 25-35 quality holdings with a long-term investment horizon and will be managed by Andreas Brock who recently joined Coeli Asset Management. *"We are excited to present the launch of the Coeli Global Select Fund and at the same time welcome Andreas to Coeli. His investment style of buying a selected portfolio of high quality names is a great match with our focus of high conviction asset management"* says Lukas Lindkvist, Chief Investment Officer at Coeli Asset Management.

Andreas has long experience of equity research and investments and invested globally during his time with Capital Group in London, but his formative years as an investor dates back to his days with ABB's M&A department in China: *"In China, I learnt a lot about the need to do in-depth research and still today, I only invest in quality companies with strong sustainable market positions. This fund is a selection of the very best and most exciting investment opportunities around the world, the kind of stocks you want to have in your kids' portfolios for the long-term".*

The fund is open for initial subscriptions, and sets its first NAV on 1 December 2014.
