

ArcelorMittal's prepainted steel now comes with a guarantee of up to 35 years

With Granite® HDX and Granite® Storm, its new top-of-the-range painted steels for roofs and facades, ArcelorMittal now offers automatic guarantees of up to 35 years.

As of 1 April 2015, ArcelorMittal's Granite® range comes with an up to 35-year automatic guarantee covering corrosion and paint, extendable upon request.

The guarantees offered for an outdoor building project are an important factor in the final choice of material to be used.

ArcelorMittal has vast experience in the production of organic coated steel, and with buildings erected more than 40 years ago using its steel, it is in a perfect position to assess the effects of time on its products. The company's integrated production process (from hot strip mill through to coil coating) guarantees full traceability and a high level of quality.

This is why ArcelorMittal has decided to pass on to its customers all the benefits of its quality improvements by increasing the automatic guarantees offered for its Granite® range. For its customers, this means greater sustainability and a longer lifetime – a double advantage that helps to reduce the environmental footprint of buildings.

Granite® HDX is a highly durable prepainted steel for demanding environments. Coated with polyurethane, it is the best choice for buildings with a long life expectancy or situated in corrosive environments, such as coastal or industrial environments.

Granite® Storm is a prepainted steel with a matt textured finish. It is ideally suited for roofs as it reflects the sunlight like ceramic tiles.

About ArcelorMittal

Europe
ArcelorMittal employs more than 100,000 people and produces approximately half of its total steel volume in Europe. With a presence in 17 European countries and around 400 different sites, ArcelorMittal Europe had revenues of €35 billion and a crude steel production of 43 million tonnes in 2014. We supply flat and long steel products for all major steel markets, including the automotive, construction, packaging and household appliances industry – supported by a leading R&D and distribution network with 9 laboratories and 1,000 full-time researchers in Europe.

Worldwide
ArcelorMittal is the world's leading steel and mining company, with a presence in 60 countries and an industrial footprint in 19 countries. Guided by a philosophy to produce safe, sustainable steel, we are the leading supplier of quality steel in the major global steel markets including automotive, construction, household appliances and packaging, with world-class research and development and outstanding distribution networks.

Through our core values of sustainability, quality and leadership, we operate responsibly with respect to the health, safety and wellbeing of our employees, contractors and the communities in which we operate.

For us, steel is the fabric of life, as it is at the heart of the modern world from railways to cars and washing machines. We are actively researching and producing steel-based technologies and solutions that make many of the products and components people use in their everyday lives more energy efficient.

We are one of the world's five largest producers of iron ore and metallurgical coal and our mining business is an essential part of our growth strategy. With a geographically diversified portfolio of iron ore and coal assets, we are strategically positioned to serve our network of steel plants and the external global market. While our steel operations are important customers, our supply to the external market is increasing as we grow.

In 2014, ArcelorMittal had revenues of US\$79.3 billion and crude steel production of 93.1 million tonnes, while own iron ore production reached 63.9 million tonnes.

ArcelorMittal is listed on the stock exchanges of New York (MT), Amsterdam (MT), Paris (MT), Luxembourg (MT) and on the Spanish stock exchanges of Barcelona, Bilbao, Madrid and Valencia (MTS).
