

PRESS RELEASE

July 11, 2019 – Oslo, Norway

Press release: Nel launches the A1000 electrolyzer**Nel Hydrogen Electrolyser, a subsidiary of Nel ASA, today officially launched the A1000 alkaline electrolyzer**

“After working with large-scale solutions for our alkaline electrolyzers, we have now designed a new medium scale, 2 ton/day solution. It is a pleasure to now officially include this product in our electrolyzer offering,” says Anders Søreng, CTO of Nel.

The A1000 builds on the industry leading A-Range atmospheric alkaline platform, and comes in the size range of 600 to 970 Nm³/hr, allowing for flexible scale-up according to customer demand.

“We are paying close attention to our customer needs, and are already experiencing significant interest for this solution in the market. With the A1000, we are offering the same robustness and reliability of our conventional A-Range units, but with a lower cost for medium-scale needs,” says Luc Graré, VP Sales and Marketing in Nel.

About Nel ASA | www.nelhydrogen.com

Nel is a global, dedicated hydrogen company, delivering optimal solutions to produce, store and distribute hydrogen from renewable energy. We serve industries, energy and gas companies with leading hydrogen technology. Since its origins in 1927, Nel has a proud history of development and continual improvement of hydrogen plants. Our hydrogen solutions cover the entire value chain from hydrogen production technologies to manufacturing of hydrogen fueling stations, providing all fuel cell electric vehicles with the same fast fueling and long range as conventional vehicles today.
