**About Eurocine Vaccines**

Eurocine Vaccines is a development company in the highly intense vaccine area, bridging the gap between innovation and market.

Through its portfolio strategy, innovative vaccine candidates are given the opportunity to reach the market quicker, while investors are offered risk diversification with big future leverage. These candidates are later licensed to partners for commercialization.

The company is in the possession of its technology platform, Endocine™, which has been tested in four extensive clinical studies with over 400 subjects.

Listed at Spotlight Stock Market, XSAT, Eurocine Vaccines, EUCI, today operates at the heart of the bio-scientific cluster of Karolinska Institutet, Solna, Sweden, and has attracted several internationally merited vaccine specialists to its board.
