

One RescueRunner ordered by the Swedish Sea Rescue Society (SSRS)

The Swedish Sea Rescue Society (SSRS) order a RescueRunner and further expand their fleet of RescueRunners.

SSRS once developed the RescueRunner for rescue missions in shallow and rocky areas where other boats cannot go, and today there are over 60 RescueRunners in operation at their 69 rescue stations in Sweden. Many of SSRS RescueRunners have been in operation for over 10 years and have helped save many lives. The order will further increase their capacity to save lives at sea.

SSRS is not only a customer to Safe at Sea, they are also a partner when it comes to development and training.

"The work of SSRS is very important and appreciated and it is great fun for us when they choose to further expand their fleet and to use the RescueRunner system in more places," says Henrik Hartman, CEO of Safe at Sea AB (publ).

The RescueRunner will be delivered during Q4 2020.

Order value is approximately SEK 320.000
