

# Two new SafeRunner systems for Romanian beaches

The Romanian lifeguards in Constanta already have several SafeRunner systems in operation along the city's beaches. They will now have access to an additional two SafeRunner systems.

Romania's beaches are becoming safer and safer with the fantastic work of the lifeguards. SafeRunner has become a very popular rescue boat in Romania as it can be launched from the beach and efficiently reach and save one or more people. In addition to the great manoeuvrability and stability, SafeRunner also offers a large rescue platform and features for efficient and safe SAR operations.

"SALVAMAR EFORIE will now reinforce their operations with another SafeRunner system and we wish them all the best in the impressive and important work they do," says Henrik Hartman, CEO of Safe at Sea AB.

The SafeRunner systems will be delivered in Q1 2022

Order value: approx. 370 000 SEK
