

RescueRunner will increase water rescue capacity in Montenegro

Safe at Sea AB (publ) has through their Montenegro distributor received an order for three (3) RescueRunner systems.

Despite not having a very long coastline Montenegro focuses on and prioritizes safety at both sea and in their lakes. Investments are now being made in order to increase the water rescue capabilities in the country, partly financed by EU funding. Within an EU procurement, three RescueRunner systems will now be delivered to strengthen local rescue capacity.

“Fantastic news that Montenegro choose the RescueRunner system to strengthen their rescue capacity. We hope that these new SAR boats will contribute to increased safety for both operators and the public”, says Henrik Hartman, CEO at Safe at Sea AB.

The boats will be delivered in Q2 2022.

Order value: approximately SEK 1 120 000

Safe at Sea AB designs, manufactures and sells light, flexible och cost effecient Search-and Rescue SAR systems. These systems contribute to saving lives and optimizing SAR operations around the world and are likely to be the most effecient systems in the world when it comes to rescuing casualties out of the water. The systems involve personal equipment, operating methods, launch-and recovery solutions as well as training. The fundament of Safe at Seas product portfolio is the RescueRunner, SafeRunner, FireRunner and GuardRunner. The company is based in Göteborg, Sweden and listed on the Spotlight stockmarket since the 10th January 2008.
