

# The Swedish Sea Rescue Society (SSRS) order another RescueRunner

SSRS further expands their large fleet of RescueRunners.

By ordering this RescueRunner SSRS will further increase their capacity to save lives at sea. Many of the SSRS RescueRunners have been in operation for over 10 years and helped save many lives at sea.

SSRS once developed the RescueRunner for rescue missions in shallow and rocky areas where other boats cannot go. SSRS is not only a customer to Safe at Sea, they are also an important partner when it comes to development and training. Not least the important EIEcoRunner project.

"We are very happy to receive this order from SSRS and we hope that the RescueRunner will be very useful for the organization," says Henrik Hartman, CEO of Safe at Sea AB (publ).

The RescueRunner will be delivered during Q3 2023.

Order value is approximately SEK 450.000
