

Experience the Parans light at Vasakronan's office

At Vasakronan, Sweden's largest real estate company, the visitor is welcomed with Parans light to the Gothenburg office. The property owner of the modern activity-based office is now evaluating the Parans system in order to be able to offer it in best possible way within the real estate portfolio.

Vasakronan has a strong focus on the modern office and how we as people use it. In the office, innovative technology is displayed by Vasakronan, which means that the Parans light will be exposed continuously to many stakeholders. The Parans light is the first thing the visitor get to experience in the office, where it is spread over the wall - a wall light - in a powerful way, while giving the green plants a natural light. Further into the premises, the Parans light is spread in a lounge area and creates a pleasant environment with good light dynamics. The intention of Vasakronan is to, after a period of evaluation, offer the Parans solution within its property portfolio.

- This is a very important installation for us because the Parans system is now being evaluated by one of the largest players in the Swedish real estate industry, says Anders Koritz, CEO of Parans. We have understood that the customer has been pleased with the installation so far and we are looking forward to developing our cooperation.
