Mölndal March 19, 2021

Order on Parans systems for health care center in Sweden

This press release is based on the press release published in Swedish on March 19, 2021.

Parans has received an order from Betonmast AB where the end customer is a company in the health care sector, that solves its daylight needs in parts of the premises through Parans sunlight solution. The order value amounts to approximately 730,000 SEK.

Parans has received an order from the construction company Betonmast AB, for a tenant within the health care sector situated in a shopping mall in Sweden. Through Parans' sunlight solution, the tenant will solve its daylight needs for a windowless corridor. The installation is expected to take place during the second quarter of 2021.

- We are happy for receiving Betonmast's order. It is very satisfying that Swedish companies also see the possibility of being able to use innovative technology as our sunlight solution to meet the need for natural light in windowless spaces. We hope of course that our customer through this project sees more opportunities with our solution, but also inspires others to solve the daylight needs in a smooth innovative way, says Helen Forsling, CEO at Parans.
