DexTech Medical AB, org.no 556664-6203

## **DexTech's Phase IIb study for OsteoDex concludes with positive follow-up results**

The company's Phase IIb study for the treatment of skeletal metastatic castration-resistant prostate cancer (mCRPC) shows continued promising follow-up data and confirms previously announced partial results.

Formalities in the form of closing the study database (database base lock) and signing of follow-up forms (eCRFs) have been delayed somewhat as a result of the ongoing virus pandemic. The study's final results, including 2-year survival data, will be presented, together with the company's and CEO's comments, in the form of a press release in June.

*DexTech Medical AB is a Swedish research company that, based on its technology platform, has developed four drug candidates that are protected by patents. The main candidate is OsteoDex for the treatment of castration-resistant prostate cancer (CRPC) with skeletal metastases. A successful Phase II clinical trial has been conducted with OsteoDex where the result shows high tolerability with mild side effects as well as treatment effect on patients who fail on existing drugs. DexTech's goal is to license the respective drug candidate by the latest phase II study. DexTech Medical AB is listed on the Spotlight Stock Market.*
