

# SyntheticMR Introduces Quantitative Neuro Reports to Enhance Clinical Workflow

SyntheticMR has released a new update to SyMRI 11.3.11 & 12.1.11 that provides condensed and relevant quantitative neuro report for both radiologists and providers.

SyntheticMR's Quantitative Neuro Report is a user-friendly solution.

These reports provide:

- Automated quantification of brain volumetrics
- Normative age-stratified reference curves
- Myelin volume and distribution
- A compatible format with most RIS/EMR systems, including DICOM SR and PDF encapsulated DICOM.

Dr. David Lefkowitz of SimonMed has collaborated with Synthetic MRI in the understanding and quantification of brain myelin and related disorders. “The new reports from SyntheticMR are outstanding,” says SyMRI user Dr. David Lefkowitz of SimonMed Imaging. “The data is presented in a very accessible format and the guidelines provided are excellent. These reports will help immensely with referring professionals and increasing our utilization.”

“The introduction of the Quantitative Neuro Reports is a massive milestone for our organization,” says Kyle Frye, CCO of SyntheticMR. “These reports enhance our workflow capabilities while strengthening our business push globally. We are thrilled to begin discussion and implementation of this exciting new SyMRI feature. This further cements our ambition to be the standard of care in neuro imaging.”

SyMRI NEURO is designed to help you save valuable time by reducing scan time, all the while aiding as an objective decision support for diagnosis and patient follow-ups. In a single fast scan SyMRI NEURO offers a fast and standardized protocol with clinically relevant quantitative data for more robust assessments of patients, particularly with quantitative assessment of myelin and brain volumes.

*SyntheticMR AB develops and markets innovative software solutions for Magnetic Resonance Imaging (MRI). SyntheticMR AB has developed SyMRI®, delivering multiple, adjustable contrast images and quantitative data from a single 5-minute scan. The SyMRI product is available in different packages. SyMRI NEURO delivers multiple contrast images, tissue segmentations and quantitative data on the brain. SyMRI MSK provides multiple contrast images and quantitative data for knee and spine anatomies. SyMRI NEURO is CE-marked and FDA 510(k) cleared and SyMRI MSK is CE-marked. SyMRI is a registered trademark in Europe and the USA. SyntheticMR is listed on the Spotlight Stock Market Exchange in Stockholm, Sweden. For more information, visit [www.syntheticmr.com](http://www.syntheticmr.com).*
