Linköping, September 1st, 2025

SyntheticMR AB (publ) develops and markets innovative imaging solutions that enhance neuroimaging workflow efficiency and diagnostic precision. SyntheticMR's SyMRI® solution measures brain absolute tissue properties and generates multiple contrast-weighted images, performs automatic segmentation of biomarkers, and delivers quantitative data in a single fast scan. Combinostics, a SyntheticMR company, offers the AI-powered cNeuro® suite of products that help clinicians make a difference in the lives of patients with neurological disorders. Our products are, among other things, CE-marked and FDA-approved, and we are listed on Spotlight Stock Market Exchange in Stockholm. SyntheticMR is headquartered in Linköping, Sweden, with an additional office in Tampere, Finland. For more information, please visit syntheticmr.com and combinostics.com.
