

Sivers IMA wins SEK7.3m follow-up order from Fortune 100 customer

Sivers IMA Holding AB (Nasdaq First North: SIVE) today announced that its subsidiary, CST Global, received a new order worth SEK7.3m from an existing, US-based Fortune 100 customer. The order is in addition to existing framework orders CST Global has had with the same company.

The new contract is for the supply of semiconductor devices and is the result of Sivers IMA continuing to successfully supply prototype, pre-commercial and commercial semiconductor devices in sampling and production volumes, to the standards and quality required by the customer. Today's order will be delivered and billed before the end of 2019.

"Winning this follow-up order with the established Fortune 100 customer is evidence of our innovative and high-quality semiconductor devices and brings the total order value we have with this company to about SEK50m in less than a year. By continuing to meet the customer's performance and quality conditions, we expect additional orders in the future," said Anders Storm, CEO of Sivers IMA.
