

Jolly update

Preparations for the FAT (Factory Acceptance Test) operations began with CybAero's flight team in place in China in November 2016. Jolly and CybAero are currently working on getting the last remaining items through Chinese customs. Due to the upcoming Chinese New Year's celebration, Jolly has requested that the FAT operations resume in early February immediately after the celebrations are complete. Invoicing of the three systems will be ongoing as the FAT's are completed and approved.

About CybAero

CybAero develops and manufactures Remotely Piloted Aircraft Systems (RPAS) for safer and more effective aerial operations in various environments, including those hazardous in nature. The company has made a great international impact with its APID One helicopter, which can be adapted for both military and civilian applications such as coastal and border surveillance, search and rescue missions, and mapping. CybAero's head office is located in the Mjärdevi Science Park in Linköping, Sweden. The company has around 50 employees and has been listed on the Nasdaq First North since 2007. FNCA Sweden AB is the company's
