

Dynavox Group Signs SEK 1.2 billion social loan refinancing agreement with Swedbank

Dynavox Group AB has signed a new refinancing agreement with Swedbank totaling SEK 1.2 billion, classified as a social loan under the LMA Social Loan Principles (SLP). The agreement was signed on September 26, 2025, and reflects Dynavox Group's continued commitment to advancing sustainable social initiatives that positively impact society.

The credit facility comprises a SEK 900 million term loan and a SEK 300 million revolving credit facility (RCF), which may be used for working capital and strategic acquisitions. The facility has a three-year term with two optional one-year extensions.

"This social loan represents an important validation that Dynavox Group is making a concrete and significant difference for people and society, and that we are a fundamentally sustainable company," said Linda Tybring, CFO of Dynavox Group.

The classification as a social loan confirms that Dynavox Group meets the SLP's criteria for companies that contribute meaningfully to social development. The terms remain broadly in line with the previous financing agreement with Swedbank.

About Dynavox Group

Dynavox Group AB (publ) is the parent company for Tobii Dynavox, the global leader in assistive communication. Headquartered in Stockholm, and listed on Nasdaq Stockholm (DYVOX), Dynavox Group, together with its brands has over 950 employees and serves customers in 65+ countries. Tobii Dynavox's custom designed solutions enable people with disabilities such as cerebral palsy, ALS, autism and spinal cord injury to communicate with a voice of their own, develop literacy skills and live more independently. To date, hundreds of thousands of people worldwide have benefited from our integrated solutions, which include hardware, software, clinically developed language systems, mounting solutions, training, and dedicated support. We offer extensive funding expertise to facilitate funding for as many people as possible. As voice and motor impairments are common among our users, our solutions are accessed via alternative methods, such as eye gaze or touch screen. Using AI-based speech synthesis, we offer users a personalized voice identity in over 30 languages, for children and adults.
