

PRESS RELEASE

January 13th, 2020

RLS GLOBAL AB RECEIVED ITS FIRST ORDER OF CHLORASOLV FOR CLINICAL USE

During the autumn of 2019, RLS Global focused on the Swedish market with the aim to get ChloroSolv established as a standard product in the regions. In parallel, RLS has worked in close collaboration with OneMed to penetrate the market in municipalities and regions there OneMed has supplier agreements. RLS also has ongoing dialogue with international players in order to establish ChloroSolv in the international market.

RLS Global has now received the first order of ChloroSolv for clinical use. The size of the order is still of minor nature, but it is an important confirmation that the work carried out during the autumn is now showing result.

'We believe that during first half of 2020, RLS Global will receive several positive breakthroughs from the Swedish market as a result of the work that took place during autumn 2019 and is according to plan. At the same time, we have just begun the journey towards achieving our ambition that ChloroSolv is the obvious choice in active debridement of chronic wounds. ChloroSolv will also get the first footprints on the international market during 2020, says Karin Fischer – CEO RLS Global'.
