

## **VibroSense Dynamics is preparing for launch – has started cooperating with Retailer**

**As a step in the preparation for launching VibroSense Meter® II, the combined hand- and foot-instrument, VibroSense Dynamics AB has started to cooperate with two retailers. These retailers are active in the UK, the Benelux countries and Germany.**

VibroSense Dynamics has initiated a cooperation with two retailers as a part of the plan to launch the Vibrosense Meter® II. The retailers are MedCaT (<http://www.medcat.nl/EU/>) active on the German and the Benelux markets and MediMax Global (<http://www.medimaxglobaluk.com/>) active on the British market. Both companies have a long history of selling medtech products to the target customers for the VibroSense Meter® II which are for example clinics in neurophysiology, oncology and diabetes.

VibroSense Dynamics has not yet signed formal retailer agreements since the purpose of the cooperation is to evaluate these retailers' ability to sell the VibroSense products and services.

- These retailers are potentially very good partners for VibroSense since they do not only have a long experience in selling similar medtech products but they also have a strong network of customers and partners potentially interested in the VibroSense products and services, says Ulf Rogers, Sales- and Marketing Director, VibroSense Dynamics AB.
