

Press release

April 17, 2020

VibroSense Dynamics has received an "Intention to grant" for a new patent.

VibroSense Dynamics AB (VibroSense) has received an "Intention to grant" from the Swedish Patent Office and a positive Written Opinion from an international PCT application. The patent covers an important part of VibroSense's measurement technology to measure skin temperature continuously during an examination with VibroSense Meter® II.

VibroSense strengthens the protection around its unique technology MultiFrequency Vibrometry which is part of the company's product VibroSense Meter® II. The new patent extends the company's IP protection for further 20 years, which is part of the company's long-term strategy.

- We are continuously working to strengthen the company's IP protection and with our latest patent we have now extended the protection until 2040. Our long-term IP protection strategy is based on our continuous efforts to seek new patents as we obtain clinical data that we deem patentable," says Hans Wallin, CEO of VibroSense Dynamics AB.
