VibroSense Dynamics signs distribution agreement with Fu Kang Healthcare in Singapore

VibroSense Dynamics AB (publ) announces today that a distribution agreement has been signed with Fu Kang Healthcare Supply Pte Ltd, a Singapore-based company specialising in distribution of orthopaedic and rehabilitation products. The agreement grants Fu Kang Healthcare the right to market and sell VibroSense Meter® II in Singapore.

Founded in 2005, Fu Kang Healthcare has grown to become one of Singapore's leading suppliers of orthopaedic appliances and rehabilitation products, serving orthopaedic surgeons, occupational therapists, physiotherapists, podiatrists and nurses. The company holds a Good Distribution Practice for Medical Devices (GDPMS) certification issued by the Health Sciences Authority of Singapore, demonstrating its commitment to maintaining the quality and integrity of medical devices throughout the supply chain, a strong foundation for introducing VibroSense Meter® II to the Singapore market.

“We are pleased to partner with Fu Kang Healthcare, whose expertise and reach within rehabilitation and orthopaedics aligns well with our ambition to establish VibroSense Meter® II as a standard diagnostic tool in Singapore and the wider region”, says Toni Speidel, CEO of VibroSense Dynamics AB.

“The new Gold Standard for reliable detection of nerve damage”

About VibroSense Dynamics AB (publ)

VibroSense Dynamics AB (publ) develops and sells medical devices and services to facilitate diagnosis of nerve damage in the hands and feet. The method is based on measuring and quantifying the ability to perceive vibrations applied to the skin at multiple frequencies. The company's customers include diabetes clinics, occupational health providers, hospitals, primary care centers, and researchers.

Our vision that the company's products shall become a standard tool in all neurological examinations, to detect early signs of sensory changes so that patients and healthcare providers can take preventive action to avoid, reduce, or delay the onset of nerve damage in the hands and feet.
